Of course criminal insane people are everywhere among millions of people online. Some people are naive and find these racist KKK online, right here in these groups. And weird freaks, with clinical insane qualities of possessive and murderous barbaric insanities from the darkest ages of Ceausescu, but the Great Depression is returning with racists in power, degradation, lack of interest in humanitarian matters, always dictating away the humanitarian. Always discriminating and people taken advantage of by Google in discriminating circumstances and violations of rights. Terror-sadistic criminals rape people using the Internet, and since it is International, little can be done while revenges are taking place in dirtiest human rights violating forms where all rules are gone like in torture prisons in America, a torture prison psychology rises with crimes resembling Abu Ghraib. But remember the prison experiment some decades ago, a famous experiment that placed Americans for some time into a study prison, and tortures immediately formed between those being guards and those prisoners, the quality lays in the psychology of the society where only some form of Gestapo rules, a quality distant from a cultural European person's mind.

Continued: The growth of the psych ward, Ceausescu form of mindset aiming at one quality: Teach em a lesson. Doesn't matter if it is in a University psychology experiment, doesn't matter if it is elsewhere.

When the bomb in Japan was dropped, the CIA knew the war was lost, the Japanese emperor was sending out messages to the world and to the United States that Japan is ready to surrender. The US president didn't kindly say: 'Oh God save me' before ordering the dropping of the two atomic bombs on Japan, but a Bush guy saying Nixon was flip flopper and said: nukam, teach em a lesson. The 'tendency' didn't go away.

.
