A Martian nerve cell as clear as cells can be

Some people said I identified a piece of dirt/crack to be osteocyte/
blood vessel remains on Mars.

In the following photo is a labeled, clear neuron remains found on
Mars by NASA Rover Opportunity s Microscopic Imager on Sol 1443.

If the above link doesn t work, one can simply go to

<http://www.wretch.cc/album/lin440315>

and click on the Martian fossils album. The first picture in the
Martian fossils album shows the subject nerve cell clearly.
