My paper, Cost Theory and the Cost of Substitution -- a clarification" is published, and available for free here:
<http://SaintPaulScience.com/CostTheory1.pdf>

The paper clarifies many long–standing confusions about the cost of substitution, which is the fundamental concept behind Haldane's Dilemma. The paper was peer–reviewed by evolutionary geneticists, including James Crow and Warren Ewens, who acknowledge it is correct.

The paper was also peer–reviewed (at a different journal) by Joe Felsenstein, who (mistakenly) claimed it is incorrect. Felsenstein published his peer–review (at ARN.org, through an intermediary). A response to Felsenstein's review is available here:
http://SaintPaulScience.com/Felsenstein_comments.htm

The talk.origins website has misrepresented my material for years (despite my protests). Those misrepresentations are discussed here:
http://SaintPaulScience.com/talk_origins.htm

Evolutionist Robert Williams has misrepresented my material for years (despite my protests). Those misrepresentation are discussed here:
http://SaintPaulScience.com/Robert_Williams.htm

Web updates on Haldane's Dilemma are available here:
<http://SaintPaulScience.com/Haldane.htm>
