Courses in Primate Ethology in the Mona Foundation: FIRST TERM

The Mona foundation ([www.fundacionmona.org](http://www.fundacionmona.org)) will be organising new sessions in Primate Ethology during the first term of 2008. The basic objective of these courses is to study the behaviour of non-human primates from both a theoretical and practical perspective. For this reason we will devote 45% of the time to the practice of observation ethology of the animals living the Mona Foundation Recovery Centre and 55% to theory.

There are three levels of training: basic (level 1); intermediate (level 2) and advanced (level 3). It is not possible to join levels 2 or 3 without having done the previous courses.

Each course will last approximately 15 hours (8.5 theoretical and 6.5 practical) given over two days of study (Friday and Saturday), and will begin in March 2008. The timetable will be from 10.30h to 18.30h. The price of inscription includes a file of course material and CD-ROM and a certificate of completion of the course.

Location of Courses:

Fundación Mona  
Carretera de Cassà  
17457 – Ruidellots de la Selva,  
Girona  
España
