Hi

This is a shameless pitch, we are looking for help writing science textbooks for grades 10 – 12. Without authors', editors' and publishers' royalties the cost to print the books comes down dramatically.

As a start we are writing books for South Africa but want to use these as a basis to kickstart the same initiative elsewhere when they are done (early next year).

We are looking for help writing the missing content, editing, or recruiting volunteers to help. If you are interested in taking a look please visit the Free High School Science Texts at [www.fhsst.org](http://www.fhsst.org) and help a good cause!

Thanks

Mark
