Greetings,

For those interested in Dr. Robert Hazen's 2006 Teaching Company course "Origin of Life" or his 2005 book "Genesis", I've created a phpBB forum for friendly, in-depth discussion, one lecture at a time:

<http://teachingcompany.12.forumer.com/viewforum.php?f=17>

No login is required to read, reply, quote or post. I see an advantage of everyone being able to get through this course at their own speed, though it might make more sense not to get too far ahead of others.

cheers,
Doug
