I suggest you compare CVs you deluded twit. This is the "Zick-Michaels Syndrome". You bury your heads up your rectum, get intoxicated on your own emissions, and naturally, reality is kept at bay. Mad alchemist Navaga tries to do it by translating good science \*back\* into folk psychology and wonders why he people tell him he's so ineffectual! You are behaving like idiots.

Then you might like to look into your history here and why have you

sci.cognitive: Re: The Hard Problem for Behaviorists

spent so much time \*trying\* to follow-up matters that I have been referring to. You may not realise it, but that's what you and the other nitwits here tend to do. You've doing it now you twit! This is just one reason I keep telling you that you don't know what you are talking about. You are just "estranged", "alienated", "dissociated" ie unaware or ignorant of these contradictory fragments of your behaviour. Look up "intensional opacity"
