Abstract Information and Knowledge FWIW

Let's just cut to the chase here and get to the bottom of abstract information and knowledge. As in the case of free will we have to ask what information and knowledge can be abstract or abstracted from. And as before we find that the only thing from which information and knowledge can be abstract are the subjective circumstances of the will. This is the sense in which it is said to be abstract and the only way we can be conscious of it and reason abstractly with it.
