Wrong. The Jewish People do not constitute a race. Among Jews you will find light skins, dark skins (there is an Ethiopian branch of the Jewish people going all the way back to the Queen of Sheba who bore children to King Solomon. She was as black as the ace of spades), varying eye color, varying hair texture, varying height and varying physique. Jews, contrary to popular belief have taken mates from among whatever people they have dwelt with. Intermarrying with the locals goes all the way back to biblical times. I think in the Book of Ezra (if not Ezra then Nehemiah) the prophet importunes the Jewish men to divorce their foreign wives. The first thing the Hebrews did when they took their holy land from the Canaanites was to marry Canaanite women. King David's grandma, Ruth was a Moabite, not an Israelite. Among the various kiths and kins of mankind you will not find a more genetically mixed bunch than the Jews.

There is a Jewish Culture, but that is transmitted by upbringing and custom, not by genes.
