Multinational corporations and puppet dictatorships set up by the strong arm of the military industrial complex have plundered the wealth of Nigeria and massacred/displaced the Ogoni people. In short, there is less (legitimate) government and more "inhibition of the democratic potential of the people by goons and goon-lackeys".

You either lie or disinform, Polka.

What the world needs is more GOOD government and less BAD government, not more or less of an abstract, conceptual, unmodified "government".
