Hi,

Interesting, but note that in 2002 the prize was given for "experimental economics".

<http://nobelprize.org/economics/laureates/2002/index.html>

And what about the Nobel Prize for literature? Isn't that rather subjective?
Or better a Nobel Peace Prize, and especially when the death of a recent
"winner" may open the door to peace in the Middle East? (or so we can hope)
