I'm gonna have to call bullshit on this one. Do
the math.

30,000 miles. Let's give it 8 days rather
than 7 for a week.

$30,000 / 8 = 3,750$ miles a day.

3750 miles a day / 24 hours = 156 and change
miles in an hour -- for the entire day.

You're telling us that you drove you truck
156 miles an hour, 24 hours a day, 8 days
a week.

Yeah. Right.

> Give me one of the "foot in mouth" examples and

How's that foot tasting today?

.
