based on what he can afford). As a result, a minor surgical procedure I need costs \$3000 in the U.S. because insurance usually covers it and \$500 in Mexico where there is no health insurance and prices for medical procedures are based on what patients can afford and not what the insurance of the few lucky patients who have it will pay.

Are Mexican doctors and surgeons any good? And are Mexican hospitals sanitary? Would you drink the water in a Mexican hospital?
