I cant give continuity to this as I wish. I have to stop writing and wait another day. I am used to have a computer 24 hours a day the whole year on and ready to write whatever comes my mind; instead I have to suffer this TORTURE. I found somewhere the categories, from SENSORY DEPRIVATION (I need a lasik, matter of simple money compared to this effort), CONSTANT HUMILIATION (doh), etc. What, am I supposed to say, do I have to tell all my experiences like yesterday s? I can do that later. But my memory is definitely failing and I am eating in all McDonalds around teh same blocks. What is it, coffee comes diseased or something is dropped in it? In other words: what I was about to write publicly yesterday I sent in some emails and now I dont fully remember it. I do hope they are being read and saved, professinally it should be done given that they have enough resources.

I have ENOUGH knowledge and information to avoid falling into this situation because of my acts. I am dirty, loaded, badly dressed. The city os not providing adequate services BECAUSE of that interference. I call it madness. I insist: I am disabled and inabiltated by external excesive illegal force. SOME of the people I mentioned are linked by a mafia bond based on torture. I dont admit their arguments nor their cowardice, they dont hold before reason.

Note this algorithmic ethic (I thought about it yesterday):

0. you are telepath
- I. you cannot read, because you can be located
- II. you canot speak, because you can be located
- III. you cannot name other people because they can be located by \_them\_
- IV. you cannot look at your copule because she/he can be located by \_them\_

This is an algorithmic ethic, you just have to follow this algorithm:

axiom 0 (selector)  
Do  
choose any statement I-IV  
apply the statement to your life  
repeat indefinitely

## Re: Theory of beliefs, belief fields

This ethical form can be applied INDEPENDENTLY of other people, the decision unit is the person itself and can be applied at all moment. IT is also very disabling. Such programming from within a telepathic-schizo experience would turn the subject into a willing victim by isolating him/her from outer stimulus leaving him/her under the will of the telepath (group) programming this ideas... (In Mexican it would be called to have somebody very *trabajado*, worked [out], which is indoctrinated)... [More can be said about this and its relationship to morals...]

That poor boy seems turned himself into an old man... white long hair, bald, deep wrinkles... I don't know if it can be reversed. One Luis seems have done the same, turning himself into somebody who can be confused with an Asamblea de representantes representative, Mexico DF. That man likes to speak about the Jewish conspiracy. Middle age man, he can say that he was changed because of some SECRET in the USA and acquire power by that phallacy! Then comes the sale of the method; the original man, older, I don't know where he can be but I think he may be in the US or was invited here and then left to his own resources or worse. Being younger, he can then aspire to better charges in the PAN government

Saul, the son of the man of Coca Cola, stole a black Acer Aspire computer with a half written patent and the proof of concept prototype, loosely based on the document I gave to the Director of CONACULTA in 1997 when I was trying to attach myself to the Stravinsky Institute in France to do electronic music research. It was around the time I wrote the GHAM AC document and signed the act with the public notary. It is those documents that were stolen in Veracruz and the ones that Luis can use to PRETEND I am still attached with him or I depend on him. I tried PRECISELY to get a lawyer while in the US when I FINALLY saw the possibility of becoming a human being by earning an adequate source of income... SOMEBODY *tramited* (Mexican word for going through paperwork) the CURP for my old name Fabrizio... That CURP is illegal. It is NOT automatic. The name and birth certificate were already voided in law court in Mexico and accepted by the US Embassy and the State Department of the US. I see no problem! Except that somebody may want to impersonate me and pretend this material is his while it is NOT. I have been in the US since 2003. But they have an **\*\*incentive\*\*** to go against (convenient ambiguity) people who would discover their SCAM and fraud. It is the people that began appearing in the US, and I am still confused as to what am I supposed to do with the encounters as all seem to have orders to ignore me. I know the argument: QUOTE pretend he is somebody else or I press charges against him QUOTE so they deny my identity because they are on my side! But then something bad happens to them and that same somebody can say: he did it because he is taking revenge (or some sort of excuse), so I lose support by everybody!

REMEMBER: I have a sand clock in my left hand very obvious and other signs in my right hand I already described in some other thread.

Mutilation. It is the expression of very damaged (hormonal) MALE brains expressing their wish to be mutilated and be turned into women. The

## Re: Theory of beliefs, belief fields

desire/solution is very sexual and very perturbing, also falling into the obsession level, sexual desire being the internal clasp of the psychosis. It has the characteristics of a very compact, defined and base encoding that can be easily transmitted and affect consciously and unconsciously normal people, who would then experience into sadism and torture. Note that this may be the desire of very old people too, as once maleness stops working the obvious solution would be to be turned into a woman! Passivity doubly expressed, in a dying brain, can acquire the same obsessive, shallow psychosis characteristics. In some limit it would turn into a simple semantic order/phrase being repeated and transmitted by a fully working but dying brain...

The homosexual aberration also expresses itself in the desire to have more adequate sexual couples in a population that obviously rejects homosexuality as it affects the biological (vital) need for reproduction. Mutilation of male competitors and unwilling couples turns them into possible partners, particularly if the affected mind is conscious of the mutilation and the fundamental maleness of the victim. This can also be understood as an expression of the need to acquire power, led by base instincts of primate nature and the male mounting paradigm... This idea has also the characteristics to become an obsession and be transmitted telepathically by the compact encoding quality of obsessed, verbalized ideas.
