If this is all the more interest you have in it, it's not for you. If electronics were "your thing," you'd be asking us to explain the exercises in the tutorial, not asking whether you should bother.

If you like making little circuits and stuff, go for it, but if it's a chore, you'd be wasting everybody's time.

Just do something you love to do, and the details will pretty much take care of themselves. :-)

It's good to see somebody that's actually self-aware – you will go far, whatever you decide to do.

Have fun!  
Rich
