In article <[pan.2006.03.10.06.53.58.708207@xxxxxxxxxxxxx](mailto:pan.2006.03.10.06.53.58.708207@xxxxxxxxxxxxx)>, Mark Healey <[die@xxxxxxxxxxxxx](mailto:die@xxxxxxxxxxxxx)> wrote:

Actually I was hoping someone would know what I could cannibalize the coil from.

Old AM radio loopsticks with the ferrites removed, perhaps? Then again, those might be too fragile to be useful for any significant current without cooking themselves.
