Learn how to post properly.

From:

<http://groups.google.com/support/bin/answer.py?answer=12348&topic=250>

"Summarize what you're following up.

When you click "Reply" under "show options" to follow up an existing article,

Google Groups includes the full article in quotes, with the cursor at the top

of the article. Tempting though it is to just start typing your message,

please STOP and do two things first. Look at the quoted text and remove parts

that are irrelevant. Then, go to the BOTTOM of the article and start typing there.

Doing this makes it much easier for your readers to get through your post.

They'll have a reminder of the relevant text before your comment, but won't have to re-read the entire article. And if your reply

appears on a site

before the original article does, they'll get the gist of what you're talking about."
