In article <1143734329.858578.70990@xxxxxxxxxxxxxxxxxxxxxxxxxxxxxx>, Leesa_Tay@xxxxxxxx says...

I'm looking to have a little music playing when I drive my brothers ICE CREAM TRUCK and was wondering if there are any systems that are good for this.

Like... do I absolutely have to have an external antenna? I am not looking for anything fancy with bells and whistles. Just something that would allow me to play some of my favorite AM/FM stations without having to rip the truck apart too much.

Do they have anything where maybe everything is self-contained, like a unit with a built in antenna and speakers that would do a decent job or do I still need to put in an external antenna etc....

Any suggestions guys.... would be appreciated.

Thanks in advance. : -)

LEESA (I)

Toss a boom box in the passenger seat, or, if the passenger seat isn't there, toss it on the floorboard. Should work just fine.
