\*\* Groper.....

I am trying to check out estimated battery life for a device using a MN1604 Duracell alkaline 9V battery.

I understand the capacity is 550mA, but to what voltage level is implied if this capacity is consumed?

I can find no info on the duracell website....even the capacity I got from elsewhere on the web.

\*\* From the Duracell US site:

[http://www.duracell.com/oem/Pdf/new/1604\\_US\\_CT.pdf](http://www.duracell.com/oem/Pdf/new/1604_US_CT.pdf)

Enjoy.....

..... Phil
