I am a new man in this area. who can help
me?

The manufacturer's web sites. Google for Texas Instruments,
Intel,
Motorola, Linear Technology, and so on. The T.I. website
might be the
best
bet.

Charles, Motorola hasn't made semiconductors for years. They spun off
that division into ON Semiconductor in 1999 for the little stuff, and
later, their microprocessors into Freescale Semiconductor.

Thanks Michael. I have been retired for 10 years and have not kept up.

Its a full time job keeping up, these days. :(

Re: where can I find the issues about the fabrication of the microelectronics?

Service to my country? Been there, Done that, and I've got my DD214 to
prove it.
