"Ross Herbert"

"Phil Allison"

:
:> It's still a great device for people interested in finding out more
:info
:> on> their power consumption though.
:
:
:*** The bill tells you that.

Yes, but well and truly after the event...

** Yawn.....

:> Both you and I know that the average electronics
:> enthusiast who can read circuits and build stuff knows how to clip a
:> current
:> sensor around the phase wires in the meter box and wouldn't bother
:getting
:> a licensed sparky in.
:
:
:*** You presume far too much.
:

And you didn't answer the question...

Re: Can I measure AC vampire current this way?

** I see only a series of dubious presumptions.

Hiding a giant red herring.

..... Phil

.
