Hello,

I would like to announce my half-day course before EuroSimE

Automatic Compact Modelling for MEMS: Applications, Methods and Tools

Grand Hotel di Como, Milano, Italy, Sunday April 23rd, 2006

Brief description: The course is made for engineers that use high-dimensional finite-element models during device simulation. The course is an overview on how to produce compact models directly from the FEM models for system-level simulation based on modern mathematical approaches (model order reduction).

Full description is at EuroSimeE site:

<http://www.eurosime.org/course.htm#c4>

Best wishes,

Evgenii Rudnyi
