Hi, I'm running a transient simulation in HSPICE and am trying to export the plot to some other program (MATLAB). However, using the .print statement, the results that I get is only up to 4 significant figures. How do I increase it the number of significant figures?

```
Time Voltage
1.4615e-04 1.135e+00
1.4616e-04 1.135e+00
```

I'm sorry that you have to use HSpice, but it's...

```
..OPTIONS NUMDGT=<number>
```
