[snip]

Doesn't have to be a PDA,
just something small and
with plenty of
battery life per charge.

But there

Re: PDA/handheld that can do CAD?

are quite a
few cad
packages
for PDA's,
third party.

That's mostly not an option
because soon enough I'd
have to run some
compiler or PSoC software
that doesn't come other than
for Windows.

Oh well, I'll go bargain
shopping for a laptop then
after Christmas.
The ads with today's paper
were disappointing though.
Not much on sale.
I was hoping they'd get rid
of laptops that aren't quite
up to snuff
for Vista (which I don't
want) but it seems that
might not happen.

Merry
Christma
