Hello,

I am new to using Oracd 16.0. and any prior version. I cannot find the zener diode 1N4733 in the list of parts. Can someone show me a link where I can download the part. (I believe this a two file per part, one is library and another is an olb.)

thank you
k

The idea is to use what ever one that matches the shape and symbol you need. You can always doctor it up afterwards.
