>*Does someone here has a datasheet for the SMC669 IC?*

>

>*It is the "southbridge" (?) chip in a Pentium II motherboard.*

I would think the SMC669 is probably a multi-IO chip, rather than a part of the main chipset.

This URL suggests that the SMC669 may be the same device as the FDC37C669:

http://www.gespac.com/fichier_commun/technique/SBCGEO-1_2.pdf

The specs state that the SBC uses a 2-chip "I/O Chipset: NS PC97317 + SMC669." However, the block diagram shows the PC97317 and 37C669 chips.

The data for the latter can be found here:

<http://www.smsc.com/main/catalog/fdc37c669.html>
