<fzabkar@xxxxxxxxxxxxxxxxxxxxx> put finger to keyboard and composed:

Can anyone identify the 6-pin component at locations U7 and U12 (to the left of the Atmel EEPROM):

http://www.users.on.net/~fzabkar/DSL-302G/Photos/Atmel_Viking.JPG

The device is marked as follows:

—
1KXW
—

There seems to be a similar component at the far RHS of this photo, approximately half way down:

<http://corz.org/public/docs/comms/router/circuit%20board/voyager-205-rectifier.jpg>

Its circuit reference is DN2.
