Not much of an explanation. You are only pointing out repeatedly that one has to read all of your papers to understand what you mean. Assuming you know your papers, why not simply post a quote that explains this?

>>*Such as spending countless hours with a*

>>*lonely dying person until he or she passes away. Such as giving in*

>>*complete anonymity. Such as volunteering in wild animal rescue. I*

>>*could go on and on. Some might do that to lift their self-respect but*

>>*most don't need that. They simply give.*

>>

>

>

No, I don't understand. One reason may be because they clearly contain statements that are wrong. Quoting your altruism paper: "For example, the Christian religion preaches that if you give, you will get everlasting life by going to heaven." How did you come up with this? That is wrong. The bible and all true Christian churches (Lutherans, Catholics, etc.) clearly teach that works such as good deeds, giving etc. do not suffice at all to get you to heaven. Faith does, and nothing else. Sorry, but I cannot believe statements in a paper when I know they are not correct.

Regards, Joerg
