DigiKey stocks them. The Linear Technology version is expensive, e.g. LT1013CN8 at \$4.25 each, but the TI LT1013CP version is more reasonably priced, at \$1.40. Both feature a nice low 300uV max offset voltage. As far as the LT1006 single opamp is concerned, DigiKey has this LTC-only part, \$2.88 each. It's getting scarce.
