Already got some nice native Southern Californians and Pennsylvanians
on the street, who say they're staying. Any more would be a ghetto ;-)

but there are lots of other streets. Sure, the more the merrier.

Engineers (with real degrees) don't have any real trouble (other than
the usual issues with moving) moving either way across the Canada-USA
border for a few years (extendable and convertible to permanent).

Ordinary Joes are not so fortunate.

sci.electronics.design: Re: Nerds for Kerry

During the Vietnam war, apparently, there was a street (Baldwin St.) near the University of Toronto campus that was pretty much overrun by US draft dodgers running little shops and restaurants. Very industrious folks, even the hippies.

But I don't expect many will come anytime soon, barring disaster.

Different folks came in the 1850s:
