

TempFET usage?

Source: <http://sci.tech--archive.net/Archive/sci.electronics.design/2005-04/msg01916.html>

Hi folks

I'd like to use a tempFET bts115a in a PWM design, switching a 12v fan. Not fiddled with these devices before, and I'm confused about the use of the zener protection. Are there any easy guides to using these devices?

The gate is to be switched by a PIC at 5v, but I'm unsure about the use of the zener diode recommended for protection.

TIA

Tim
