-

For all of you living in countries with sane administrations (i.e. not the USA) and good things like caller pays cell phone plans, please ignore.

I have received some e-mail from a few sources informing me that our beloved FCC is getting ready to allow telemarketing calls to cell phones. Perhaps this is just a hoax someone started. Right?

After all, the FCC can't be THAT stupid.

Then again, they did try that broadcast flag nonsense.

Madness takes its toll. Please have exact change.
