Hello Joel,

Thanks for the info guys, I have enough to see that we are in-the-ballpark.

It was a great discussion. Another topic would be how to find consultants. Other than advertising there seems to be a vacuum. I found that out the hard way when I needed an expert who could design parts for injection molding. Unless you know someone or know someone who has a friend who might know somebody it's tough. We ended up doing it in-house.

Regards, Joerg
