

Re: Relocating – need advice

Sierras; the only poop would be from deers and bears (look up cyclosporidium!) They run it over a bit of limestone to add some minerals, otherwise the slight natural acidity would eat the pipes.

The pipeline from Hetch Hetchy ends at the Pulgas Water Temple

<http://www.dakan.net/pulgas.htm>

and runs down a sluice into the Crystal Springs Reservoir, a long subduction lake directly over the San Andreas fault.

John
