Hello Steve,

your price target seems off by an order of magnitude, you be hard pressed to buy a raw off-the-shelf non graphics LCD for less then \$5, let alone a graphics LCD + buttons + battery holder + case all pre assembled for you.

You can, but not necessarily in the US. How else could they sell these starting at around \$125?

<http://www.aaronia.de/>

It's not the cheapest kind of display but FSTN. Still, the LCD is by far one of the least costly items in analyzers like these yet it does have a graphics portion, plus lots of other character based sections.

Regards, Joerg
