IIRC coffee is Douwe Egbert's mainstream product. But Frank would know better, it's been two decades since I lived in the Netherlands. And I always liked the other brand better, Kanis&Gunninck or something like

that.

Yes, coffee it is. 5 years ago Philips & DE developed the Senseo coffee maker. Absolutely brilliant product, makes a perfect cup of coffee in less than 2 minutes, and the next one in less than a minute.

<http://www.senseo.com>
