The need for working space is what provoked my ignorant question of a few weeks ago about collecting several icons under a single "topic" icon.

Then I remembered folders could have an icon ;-)

I'm now down to 32 icons on the left side of the screen, down from 56.

(I had already moved 6 of my "regulars" to the left side of the tray last summer.)

I've got a dual head video card, mainly for editing video, on 2 monitors. Recommended. Great for PCB work, one monitor for the schematic, one for the PCB

If *only* I could move the mouse pointer, over to a different computer on the network, say my laptop, wow, bliss.

A bit like these guys have done

<http://video.google.com/videoplay?docid=-7426343190324622223>

martin

I'm doing that with an IOGear USB KVM, two desktops, a laptop and a dangling cable for a "visitor".

I am considering going the dual-head video... schematic on one

Re: PsychTest

monitor, Probe simulation results on the other.

Mark/qrk had such an arrangement running several years ago.
