I heard some guy on edjamacaitional teevee say that we've already passed the point of no return. The "global warming", the melting of the ice caps, the increase of sea level depth by 5 or 10 meters or whatever, is inevitable, no matter _what_ humans do. Even if all human activity was stopped, and we all died and didn't need to decompose, it wouldn't change the fact that the ice caps are melting regardless.

Gosh, our new building (42 feet above sea level) will soon be beachfront property! I'll see babes in bikinis from my office!

John

I'm in Whittier, at about 150' elevation, so I'll still have some walk to the beach. ;-)

Cheers!
Rich

Re: Global Warming– Makes Mainstream

I was in Whittier on March 4 for the wedding of a ne'er-do-well nephew.

I doubt that I'll ever return ;–)
