When first visiting many but not all NGs, nothing comes over the modem and the computer waits "forever" for the highlighted message to appear.

If i try various messages, that problem continues, until i get an Alert saying "A news (NNTP) error occurred. Too Many Connections {Dialup-Level3 allows 4 per host/0 per feed (0==nolimit)} (Tornado v1.0.5.360"  
What the hell do i do to fix this crap?

.
