When first visiting many but not all NGs, nothing comes over the modem and the computer waits "forever" for the highlighted message to appear.

If i try various messages, that problem continues, until i get an Alert saying "A news (NNTP) error occurred. Too Many Connections {Dialup-Level3 allows 4 per host/0 per feed (0==nolimit)} (Tornado v1.0.5.360"

What the hell do i do to fix this crap?

Earthlink apparently has one server farm shut down for repairs and the other is unable to keep up with both the east and west load at times. Go to [news:earthlink.support.usenet](http://news.earthlink.support.usenet) to see the ongoing complaints and moronic solutions offered up by people who shouldn't even own a computer.

Service to my country? Been there, Done that, and I've got my DD214 to prove it.
