I just installed Win XP on a secondary drive in my system here.

My condolences. Uninstall and replace with Win2K.

I have a couple of queries but not sure which group's best to go ask.

One that ppl here may know. I suspect that NTFS partitions can't be read by W98.  
That means I shouldn't have converted from FAT32 I reckon. Duh !

Another oddball one. XP doesn't like my Highpoint 370 Raid controller it seems.  
Even though I got the XP driver from Highpoint's site, XP baulks at it,  
complaining about an ini file being wrong.

Anyone running dual boot btw ?

Any clues welcome.

Graham

I love to cook with wine. Sometimes I even put it in the food.
