In message <ed7bss0gcv@xxxxxxxxxxxxxxxxxx>, dated Thu, 31 Aug 2006, Winfield Hill <Winfield_member@xxxxxxxxxxxx> writes

if I want
say the cover page and page 7, which has a diagram, I'll
bring it up in Acrobat, delete pages 2 to 6, and print two
pages in my duplex printer.

You can do that with a PDF (and Word) file without deleting. Choose 'Print...' from the 'File' menu. In the 'Pages' pane, just enter '1,7', without the ' '.
