Very small fm radios are available for \$10 or less from most chain stores, DSE, Jaycar, etc etc, as are fm xmitters that you can plug a radio or mp3 player etc etc into. Costs are from \$10 (I bought one for \$9.95 a few weeks ago and it works fine on my GPS) to \$50.

The local "DollarTree" store has small AAA battery powered FM radios with auto scan for \$1 including ear buds (also has a built in LED light!).
