I could go
on and on,
but why
don't you
tell us what
you don't
like
about our
movies,
OK?

IMO the US has a brilliant
movie industry. Music
industry is
top notch as well.

Re: Eeyore hates American movies too...

Great effects too. In Notting Hill, Hugh Grant walks across a market. It's appears as one single camera shot, but it shows all the four seasons, from autumn, winter, spring, summer. It's so subtle, the first time I didn't even notice it.

Oops, www.imdb.com lists it as UK/US.

Sorry 'bout that ;)

haha, and dont forget a certain animation company in Bristol, good stuff there!

There is a nice very long shot (time not camera) in Contact, with a kid walking up the stairs, but I'm afraid it's probably been green screened and mangled later in post production

There does seem to be a lot of US finance for UK made films, (which say a lot about the UK) and so a UK made film can be called a US film because of the finance.

Funny since the UK seems to buy all the US debt

http://www.optimist123.com/optimist/2006/09/foreign_buyers_.html

wish I could understand this financial crap

It's an 'investment' !

Seems like every American owes ~ \$30,000.

I have zero debt.

Your Government has spent that \$30,000 for you (in tax cuts and wars and the like). That \$30,000 is in addition to any domestic debt.

Re: Eeyore hates American movies too...

Re: Eeyore hates American movies too...

So now you're an expert in international finance?

Too bad you failed to demonstrate your expertise in dealing with energy in that shift register thread.
