Look, Shit For Brains, we don't need idiots like you coming in here with you  
trans mediocre stuff and explaining number stuff.

Next thing you know someone will think it's a really bad idea to take on  
someone else's long term debt, at reduced repayments, because some stoopid  
fuck up like you broke the news to the government about sums and stuff and  
they are going to stop bailing the fuckers out!!!!!!

That's OK, you go and piss on everyone else's Christmas.

Bastard

LOL. For that outburst, your credit cards will have their interest  
compounded \*instantaneously\*.
