Hello Graham,

"back to normal" in zillions of places in that large file. Oh man, I hope there is an easier way.

Some of us, using UltraEdit, could edit "back to normal" in "zillions of places" in a matter of seconds ;-)

Almost any text editor ought to be able to do that.

Not if the file is 200MB. So far four of the ones I tried have crashed :-(

on a little file like that :^)

try wordstar (about version 4 (I think) was best)

Bye.
