Apologies. I assumed you knew something about electronic
design. My
mistake.

No problem. I just fix the fuckups committed by 'designers'.

So, you're incapable of an original idea, and that qualifies you to
criticize others' work?

Well, that pretty much is the definition of "Liberal".

No, it isn't. And fixing other people's fuckups takes a lot of knowledge,
skill and experience and many original thoughts. Reactionaries have no
original thoughts – ever.
