From what I've read, and from my perspective, we engineers should avoid Vista at all costs, while we can. Several of my co-workers have rushed to purchase new laptops, etc., now, while they still come with Windows XP. ...

Absolutamente! I also went on a mad dash to get HW with XP before it's too late. Last part came in this morning. So I don't have to worry about that stuff for several years.

I have a bunch of copies of W2K pro (so I can use the few Windows tools I must have) along with all the service packs and updates (I have them all cached).

Don't even have to worry about that 'genuine disadvantage' program. XP never had anything I needed.

Cheers

PeteS

I'll say. I regret being hasty and just running out and buying a replacement PC that had XP already installed... bloat-bloat-bloat :-(
