What browser and version are you using? That may be the problem.
Either an older version or browser that doesn't support the newer web
language. I use Netscape 7,and some pages don't format right,left−side is
ofscreen and no scroll−left possible.I'm switching to Firefox,but some
sites don't support that either,I've read.Seems everyone is "standardizing"
on IE,whatever version is latest.
