Maybe you expected something more.

Yeah, probably.

\*\* What the fuck does that mean ?

But what really miffed me was this: Placed  
the antenna on a mast after  
re-roofing the house. So, I equipped it with  
a nice preamp, splitter,  
postamps with eight outputs .....

\*\* And then this ASS blames his TV set's tuner for the bad  
outcome.

Pathetic really.

I presume you meant to say that the performance of most preamps would  
limit linearity, and would dominate IP3, etc. over the tuner.

Re: Front End (TUNER)

\*\* Do not presume.

Do not alter context.

Ignore the troll hiding below the Equator.
